This program removes all ads and logos from any image file with no loss in quality. It is very easy to use and does not need any knowledge of coding to work. The interface of the program is as user friendly as possible, with a straightforward set of controls. When setting up the converter, you will first specify whether you wish to remove all ads or just the logos. Once you have chosen the desired setting, then specify the path to the image file. After that, the program automatically begins converting the file. If you have previously used an online converter, you might find that your settings are erased when restarting your system. The main benefit of using the program over an online one is that it works fast. No lengthy wait is required to convert a number of images. Because it does not consume any system resources, you can run as many images as you like at the same time. No problem, as the RAM will be fast enough to handle all your jobs.
