VersionQ: How to make a cell on a Google Sheet that can switch between string and number? Here is a table using Google Sheet. I want to make a cell on the middle column with the top string that can be switched to number format.

A: To use formula to convert from string to number: `=TRAN(B2)=TRUE` will return a number, without losing string characters. To use formula to convert number to string: `=TRUNC(B2)` will return string, without losing number (hence you will also lose decimal places) The present invention generally relates to a delay circuit and a semiconductor memory device, and more specifically, to a delay circuit and a semiconductor memory device for generating an internal clock signal having a phase phase-shifted by a desired amount with respect to an external clock signal. In a semiconductor memory device, a delay circuit that delays the external clock signal by a predetermined delay amount is used. As one example of this delay circuit, a differential-type delay circuit is well known. The differential-type delay circuit outputs an output signal having a

Need of Our World and the Greatness of God.” During the conference, many farmers renewed their faith, prayed to God for healing and other needs, and gave thanks to God that the country and state in which they live is a place of freedom, prosperity, and spirituality. In all, 912 delegates and supportive guests (about half were from out of state) participated in the event. One of the highlights of the conference was a dedication of a new tombstone in honor of Clement Horey. After he passed away, his former county superintendent did not authorize a normal burial, but in accordance with the wishes of Clement and
