This is a plugin that lets you quickly find files and open them in the current project. You can start typing the first characters of the file name and then navigate between the projects with ease. FastOpen helps you to quickly find and open your files, save the time spent on searching and start working with the files you need quickly. Features: It remembers the last visited location and projects. You can also set a hotkey to open a file, a folder or a project. You can set the order of the opened files to see your files in the same order you open them. You can set the hotkey for open a file or folder, including multi-selection. You can also open projects with ease by using a hotkey. You can also open projects with ease by using a hotkey. It is easy to use and you don't need to understand anything else to use it. Currently it has 64 plugins for more than 60 files, folders, projects. Download it right now. Supported platforms: Works on all platforms: Windows (all versions), Linux and Mac. All versions: FastOpen is tested on Windows 7, 8, 8.1 and 10 and Linux and Mac OSX. Requirements: FastOpen requires jEdit and the plugin is installed as an external command-line application. jEdit installation Download jEdit from the official website, or from one of the websites that offers jEdit as a free download. Use the instructions that came with the download to install jEdit. Run the FastOpen application Download the plugin Double-click the file. On Windows 10 go to the Tools menu, and select Options On Windows 7, 8 and 8.1 go to the Advanced tab Click on the External button, and select the FastOpen application from the list of applications. Go to the Plugin tab Click on the Install button Wait until it is completed Open jEdit, go to Plugins A list of plugins is available. Click on Add Plugin A menu is available. Select the FastOpen folder and click on Add A list of files is available. Click on the Browse button Choose the file you want to open and click on Ok. Optionally click on

What's New in the FastOpen For JEdit?

FastOpen for jEdit is a simple and easy-to-use plugin that helps you to search for files and open them in the current project. By using FastOpen for jEdit you have the possibility to type the first characters of the file you want to open then switch between projects with ease. The plugin is maintained by: Andras Zoltan Tilcsik Since this plugin was originally a fork of project by: Kostas Kallas, see For more information or additional features see: Please feel free to report any bugs/issues you encounter. If you want to contribute features or make some small changes, please follow the instructions in the readme file. Greetings, andras.tilcsik@gmail.com Q: Odoo 8 Add/Edit Call menu in Group menu I've created a menu which adds a call (info in this case) to a new Group menu in odoo 8: class menu_mod(osv.Model): _inherit='main.menu' _name="menu.mod" def get_items(self): return [{ 'icon': 'fa fa-phone', 'name': _('Add/Edit Call'), 'action':'mod', 'category': 'call' }] def _get_info(self, context, cr, uid, ids, name, args, context_object=None): contact_name = uid return { 'name': _('Call'), 'view_mode': 'form', 'res_model': 'call.contact', 'type': 'ir.actions.act_window', }
